

NATIONAL SOUTH AMERICAN CAMELID DECLARATION AND WAYBILL

August 2022

SECTION 1 – Consignment Information

Owner of camelids: Trading name:

Address of origin of camelids:

Consignment origin PIC: Destination PIC (if known):

--	--	--	--	--	--	--	--

--	--	--	--	--	--	--	--

Consigned to Name: Address:

Description of camelids:				
Name (or number in the herd)	Species/Breed	M/F	Age	IAR, AAR or tag no. (NLIS)

Please attach a list if more information is required. Llamas – record microchip number in last column.

SECTION 2 – Biosecurity

2.1 Were all the camelids born on the property of origin? Y N

2.2 The number of different properties from which camelids have been introduced onto the property in the last 5 years not including drive-by and mobile mating⁽²⁾ 0 1-5 6+

2.3 Is the herd from which the consignment originates in Alpaca CheQA? Y N

Cert no Expiry date: / /

SECTION 3 – Johne’s disease⁽³⁾

3.1 Is the herd from which the consignment originates:

Q Alpaca Cert no Expiry date: / /
 Check tested Expiry date: / /
 None of above

3.2 Is the herd from which this consignment originates infected or suspected to be infected with Johne’s disease? Y N

3.3 Is the lifetime history known for all the animals being consigned Y N

3.4 Has the consignment ever, since birth, been co-grazing with any of the following animals that are known or suspected to be infected with Johne’s disease?

Beef cattle Dairy cattle Deer Goats Sheep Don’t know No

SECTION 4 – Lice

To the best of my knowledge, the camelids in the consignment are free of lice Y N

SECTION 5 – Treatment information for consigned camelids

Treatment	Product	Date of last treatment
Drench		
Lice Treatment		
Vaccination		
Other		

SECTION 6 – Additional information

6.1 In the past 60 days have any of these camelids consumed stock feed that was still within a Withholding Period (WHP) when harvested or first grazed? Y N Don’t know

6.2 Any other information such as additional documents attached, date of last mating, results of drenchresistance testing:

SECTION 7 – Declaration⁽⁷⁾

I (Full name): Address:

declare that I am the owner and/or person responsible for the husbandry of the camelids in this consignment and all the information in sections 1 to 6 of this document is true and correct. I also declare that, while under my control, the camelids were not fed restricted animal material (including meat and bone meal) in breach of State or Territory legislation.

Tel. No. () Email:

Signature: Date: / /

Persons making false statements may be liable under fair trading and other relevant state or territory legislation.

Owners are advised to retain appropriate records to support this declaration.

SECTION 8 – Cattle tick⁽⁸⁾

(This declaration is only required for certain interstate and some Qld intrastate movements)

I (Full name of inspector or authorised person):

- Declare that the stock described above are from a non-restricted property in a cattle tick free area, OR
- Declare that the stock described above comply with the cattle tick entry requirements for OR
- Where treatment and/or inspection was required the following inspection and/or treatment was undertaken:

Type of inspection: Treatment: Method of treatment:

Signature: Designation:

Tel. No. () Location: Date: / /

SECTION 9 – To be completed by the person in charge of the camelids while they are being moved.

(Completion of this part is optional in SA, TAS and VIC)

Movement commenced: / / Time: am pm

Vehicle registration number(s)* Tel. No. of the driver(s)* ()

I (Full name):

am the person in charge of the camelids during the movement and declare all the information in Section 9 is true and correct.

Signature: Date: / / Tel. No. ()

*When more than one truck is carrying the camelids, other vehicle registration numbers are to be recorded.

SOUTH AMERICAN CAMELID DECLARATION AND WAYBILL - EXPLANATORY NOTES

South American camelids are alpacas, llamas, vicunas, and guanacos.

Section 2 – Biosecurity introductions

Drive-by mating is taking a female to the property on which the male resides, conducting the mating, and leaving immediately afterwards.

Mobile mating is taking the male to the property on which the female resides, conducting the mating, and leaving immediately afterwards.

The visiting camelid MUST NOT reside at the receiving farm.

Introduction of camelids to your property of unknown disease status exposes your herd to potential risk. You should always obtain a written declaration of the health status of introduced animals. The use of quarantine provisions before introduction of other livestock to your herd is recommended.

For more information on Alpaca CheQA see:

<https://alpaca.asn.au/alpaca-resources/alpaca-biosecurity>

Section 3 – Johne’s disease

Q Alpaca: a voluntary alpaca quality assurance program maintained by the Australian Alpaca Association.

Check tested: A negative pooled faecal culture test of 50 adults in a herd (one-year-of-age and over), or all eligible animals in a herd of less than 50 adult animals, in which there is no suspicion of infection.

Lifetime history known for all animals being consigned: Unless all of the properties, and the animal health status (e.g. JD) of those properties, where the camelids in this consignment have resided since birth are known, this question should be answered ‘No’. Good herd records should be kept for both purchased and homebred animals to justify answering ‘Yes’.

Section 7 – Restricted Animal Material (RAM)

RAM includes any tissue, blood or other material taken from an animal and any meals derived from animals. Examples are meat and bone meals, blood meal, fish meal, feather meal etc. It does not include tallow, gelatine or milk products of Australian origin. Contact your State or Territory Department of Agriculture or Primary Industries for more details on these feeding restrictions.

Section 8 – Cattle tick

Parts of Queensland, Northern Territory and Western Australia are declared under the relevant state legislation as Cattle Tick Infected/Infested Zones. All other parts of Australia are Cattle Tick Free Zones. Section 8 is mandatory for camelids moving:

- From a Cattle Tick Infected/Infested Zone unless to another Cattle Tick Infected/Infested Zone
- From a property in the Free Zone with cattle tick infestation
- Between some states (please check with the local animal health officer).

Interstate movements

Owners planning to move camelids interstate should check the destination state’s entry requirements well in advance of moving the animals. Testing or further certification may be required.

For further information contact the relevant State or Territory department of agriculture or primary industries.
